

DIS Job Posting

The Ductile Iron Society (DIS) is seeking to fill the position of Technical Director. DIS is the only industry group devoted solely to the concerns of the producers and consumers of ductile and compacted graphite iron castings.

Scope of Job:

Build Committees

- Support committee chairs
- Help develop committee growth and provide guidance to ensure the committee is focused on the proper areas
- Encourage and support committee succession planning

Build Content focused on Ductile and Compacted Graphite Iron

- Engage the Research Committee and Research Patrons to focus on important research areas
- Work with Program and Papers committees to develop relevant and pertinent society meetings. Reach out to speakers as needed and confirm presentation details.
- Support members through employee training

Build Members (support member involvement and growth, onboard, connect, and provide industry support)

- Actively and through the Membership Committee, work to engage new members in the society through an effective onboarding process.
- Connect potential customers to foundries, individuals with subject matter experts, work to make the society an invaluable networking resource.
- Attend appropriate industry events.
- Connect with a key contact at each member on, at minimum, an annual basis.

Use the areas above to further the mission of the Ductile Iron Society.

Other tasks as directed by the society's Executive Committee and/or Board of Directors.

Background: Degree in Metallurgy, Metallurgical Engineering, or Material Science
5 years minimum experience in a ductile iron foundry or supplier to a ductile iron foundry. Good events coordinator or leadership roles in committee structures.

An idea candidate will possess strong leadership skills, ability to develop relationships, and have extensive knowledge both technically and with members throughout the industry.”

Expected commitment: The demands of this job fluctuate throughout the year. In a “normal” week, the workload is approximately 20 hours. There are greater demands, specifically during the spring, fall, and production seminar conferences. Smaller events are also expected including attending the College Industry Conference and annual Casting Congress. This position will work out of a home office and be expected to travel for various events.

Please submit your resume to president@ductile.org.
