

Ductile Iron Society Membership,

As most of you are aware, we lost a good friend, Dr. Prem P. Mohla, back on November 2, 2017. Al Alagarsamy and I both attended the funeral and we were asked to deliver a eulogy for Prem. At that time, the family discussed setting up an endowment with the Foundry Educational Foundation (FEF) in Prem's name.

Prem was a past FEF Director from 1995 to 2001. He was also a Board Member of the DIS from 1994 to 1997 and received the DIS "Lifetime Achievement Award" in June 2012. Prem was a dear friend of the DIS and he presented many technical papers. He was also very involved in the DIS Research Committee and had seven patents in his name.

Prem's family, with help from the DIS, has now established the Dr. Prem P. Mohla Memorial Scholarship Endowment through FEF. You can make a tax-deductible donation to this endowment through the FEF website: [www.fefinc.org/donate](http://www.fefinc.org/donate) or by contacting the FEF office at 847-490-9200.

This is your chance to honor the memory of Prem and his legacy to our industry. The endowment will provide for a future student to receive a scholarship in Prem's name.

The Ductile Iron Society, along with Prem's family, will be making a substantial donation to the fund. We ask you to partner with us in this important endeavor.

Thanks,

Jim Wood  
DIS Executive Director
